

BREWERY LINE

MAINTENANCE AND CARE PRODUCTS
FOR BREWERY TANKS AND BOILERS

FOR PROFESSIONAL USE ONLY

BEER DET

Detergent for brewery CIP system

Chlorinated detergent product designed for cleaning CIP of fermentation tanks and fermentation brewery plants. It does not contain phosphates avoiding the proliferation of algae in the waste water.

REMO KAL HW

Deoxidizer and descaler for hard water

Product suitable for removing limescale deposits from kettles, as a deoxidizer of metal surfaces, usable for immersion or circulation in the presence of hard waters. Contains inhibitors that prevent your solutions to attack the treated surfaces.

SPILLER DET

Chlorinated detergent for beer staplers

Alkaline detergent containing active non-foaming chlorine for cleaning organic residues in the stapler circuits. Not suitable for use on aluminium.
