HOPENET L

SCENTED LOW-FOAM DETERGENT FOR HARD SURFACES

It is a liquid detergent with a pleasant lemon scent, with multiple use, ideal to clean hard surfaces.

It has a very low foaming index and thanks to its specific formula it does not need to be rinsed when not specifically necessary.

It is a yellow liquid, water-based, lightly alkaline, that contains special sequestrant agents, a calibrated mix of anionic and non-ionic surfactants, anti-deposit agents as well as penetrating agents, that enhance its effectiveness against dirt.

It can be safely used on all surfaces, both varnished and not, on all types of fabric and on their resistant colors, on tiles, marble, linoleum, furniture and on plastic made objects, Plexiglas and skai.

DIRECTIONS FOR USE

Use it diluted with cold or warm water (for dry, persistent dirt it is preferable to mix it with water at a temperature of 25 to 50 degrees Celsius), manually with a mop, towel etc or with automated machinery (vapor cleaners, wash and dry machines, brush cleaners).

To use manually, dilute at **1 - 10% ratio**.

To use with automatic machines, dilute at **3 - 5% ratio**.

The above-mentioned percentages refer to the consistence of the dirt to be removed.

PRECAUTIONS

Refer to the safety data sheet.
