Technical Data Sheet

BRINOX

POLISHER FOR STAINLESS STEEL

Polishing agent for stainless steel ready to use. Specific product for polishing and protecting stainless steel surfaces. Specifically designed for the steel surfaces of kitchen equipment.

It is a product based on low odour glycols. Specific for polishing polished or satin stainless-steel surfaces. Leave a thin and uniform film that gives the item a shiny appearance.

It helps to prevent rust and corrosion on equipment and machinery (in mild steel) and maintain its protective action at critical temperatures.

DIRECTIONS FOR USE

Use as received.

Spread the product soaking a cotton cloth and evenly pass over the surface. A subsequent passage with a clean and dry cotton cloth will exalt its brilliance.

PRODUCT FOR PROFESSIONAL USE ONLY

STORAGE

Keep the packaging tightly closed.
Store between 0 and 40 ° C.

PRECAUTIONS

Refer to the safety data sheet
