ENZILAVA

SCENTED ENZYMATIC LIQUID DETERGENT FOR WASHING MACHINES

Super concentrated enzymatic liquid professional detergent for washing white and coloured clothing with relevant dirt. Suitable for washing at low (30°C) and medium (60°C) temperatures fabrics, in natural or synthetic fibres.

It guarantees high performance at high temperatures (90°C).
The enzymes activate throughout the washing cycle.

It is useful to eliminate bad smell, so it is suitable also for cleaning fabrics that have been used by animals/pets.

It is especially suitable for washing:

- Bedsheets
- Table cloths
- Curtains/blinds
- Towels

INSTRUCTIONS FOR USE

Use the product in dosage according to the washing program defined by the manufacturer of the washing machine.

A pre-washed phase or soaking in water at 40°C is recommended to allow the enzymes to activate and work properly.

HOW TO STOCK THE PRODUCT

The product must be stocked in its own original packaging at a temperature between 5°C and 35°C, away from incompatible substances and in a vented room.

PRECAUTIONS

Read the safety data sheet for further information.
