FLOORSP

LONGLASTING SCENTED DETERGENT FOR FLOOR-WASHING MACHINES HIGH EVAPORATION

No-foaming detergent with longlasting scent with high evaporation for floors studied for use with both floor-washing machines and mops. It leaves no residues on mechanical parts, and does not produce cavitation.

It is safe on all surfaces, painted and unpainted, on tiles, marbles and linoleum. It is studied for using with washer-driers with which, in the right dosage, it does not allow odours to form if washing residue remains in the tank. It does not produce silicone residues damaging mechanical parts of the transfer pumps.

INSTRUCTIONS

Used with floor-washing machines: diluted with water at 1%.

It is diluted with cold or hot water (for dry and persistent grime, it is preferable to use it mixed with water at the temperature of 25-50°C).

The recommended temperatures refer to the consistency of the grime to be removed.

PRECAUTIONS

Consult the safety information sheet.
