CHEMICAL SOLVING

## **IDRONET - T**

### **LOW FOAM DETERGENT**

It is a liquid multi-purpose detergent for cleaning both hard surfaces and delicate fabrics, like moquettes and carpets.

It is a low-foam product and thanks to its particular formulation does not need final rinsing when not explicitly required.

It is a clear liquid, mildly alkaline, containing special sequestering agents, calibrated mixture of anionic non ionic surfactants, antiridepositant and penetrating agents, which strengthen its effectiveness against dirt.

It is safe on all painted and not painted surfaces, on all fabrics and on resistant colors, on tiles, on marble, on linoleum, on plastic furniture and objects, plexiglas, skai

#### **USE INSTRUCTIONS**

It can be used diluted with cold or warm water and applied both manually with mop, torn and with automatic equipments.

For dry and persistent dirt it is suggested to use warm water from 25 to 50°C .

- For manual use: dilute at 1-10%.
- For use with automatic equipments, dilute at 3-5%

The recommended percentages should be related to the consistence of the dirt to remove.

#### **CAUTION**

For further information refer to our Material Safety Data Sheet.
