DETERGENT FOR STEAM WANDS, MILK FROTHERS, AND CAPPUCCINO MAKERS

Ecological citrus-based detergent with rapid biodegradation for cleaning the steam wands of automatic coffee machines, cappuccino makers, and milk frothers.

Specially designed to remove organic residue and milk fouling without damaging the contact materials over time.

It completely removes the organic residue that forms inside wands, which gives rise to malfunction and causes mold and odors.

Its action is essential to eliminate the dry residue of milk and chocolate that builds up inside and outside wands, milk frothers, and milk jugs.

INSTRUCTIONS

1. Place $\frac{1}{2}$ liter of cold water in the cleaning container and add 25 ml of detergent.
2. Open and close the steam wand 10 times with the wand immersed in the solution.
3. Rinse the steam wand by immersing it in 1 liter of clean cold water, opening and closing the steam wand 10 times.

CAUTION

Please consult the safety data sheet.
