RINSE ACID

ACID-BASED RINSE ADDITIVE FOR GLASS WASHERS

It is a concentrated product studied as an additive in the final rinse cycle of the glass washers.

It is an acid-based detergent with surfactants and adjuvants, with strong anti-foaming features to be used in all those cases where you want a quick drying of glasses, cups, etc.. at the end of the washing cycle.

It is particularly suitable to face hard waters.

INSTRUCTIONS FOR USE

Is used in the final rinse glasswashing machine, by means of appropriate dosing, the extent of 8 - 10 ml per 10 liters of water and as a function of the possible presence of hard water.

The temperature of the rinsing cycle will be 80 - 85°C, ensuring the perfect cleaning of the nozzles, in order to obtain an effective drying at the end of the washing cycle.

PRECAUTIONS

Refer to the safety data sheet.
