SPILLER DET

FOR CLEANING BEER STAPLERS

Alkaline detergent containing non-foaming active chlorine for cleaning organic residues in stapler circuits.

It is suitable for stainless steel, copper, brass, glass, enamel and rubber surfaces.

The formulation is low foaming and is eco-friendly as it does not contain phosphates, thus generating environmentally friendly residues.

Not suitable for use on aluminium surfaces.

INSTRUCTIONS FOR USE

- Dosage: 1.5 - 3%.
- Action time of 30 minutes, even with high levels of contamination
- Contact surfaces must be rinsed with water after each cleaning
- Do not mix with other products.

PRECAUTIONS

Consult safety data sheet.
