NEUTRAL RINSE AID FOR DISHWASHERS AND GLASSWASHERS

Neutral rinse aid suitable to be used in the final rinse to shine glasses and dishes in dishwashers and glasswashers.

It is formulated with a mix of low foam surfactants, water hardness softeners, and a high concentration of rinsing agents.

INSTRUCTIONS FOR USE

Use it during the rinsing phase of the dishwashers at a temperature of 85°C.
Dosage: 2-8 g per 10 liters of water according to the hardness of the water and the machine-washing cycle.

It is recommended to dose the detergent throughout the designated doser to adjust the concentration for the rinsing water.

PRECAUTIONS

Please read to the material safety data sheet.
