HAND DISH-WASHING DETERGENT

It is a viscous concentrated lemon scented detergent.

It is formulated with a dedicated combination of ionic and nonionic surfactants to obtain a strong emulsifying action toward greases.

It is neutral and does not contain alkaline substances or solvents therefore it is specific for food industry. It does not leave greasy surfaces and can be easily rinsed without leaving stains. It is very good for hand degreasing of dishes, cutlery, pottery, vessels, kitchen tops, equipments...

INSTRUCTIONS FOR USE

Dose according to water hardness (°F)

| | |
|---------------------|---------------------------|
| Soft (0-15) | 12 g / 5 liters |
| medium (15-30) | 18 g / 5 liters |
| Hard (more than 25) | 25-28 g / 5 liters |

CAUTION

For any further information see the Material Safety Data Sheet.
